

GENETIC ENGINEERING AND CELL CULTURING-ANIMAL SCIENCE PERSPECTIVES

Date : 10-09-2014

Class : II BZC students

Resource Person: Dr.S.Harikrishna Rama Prasad,
Asst.Professor, Department of Biology and Biotechnology,
Aksum University,
Axum, Ethiopia,

Brief Report : The Resource Person enlightened the students on genetic engineering, cell culturing and animal science perspectives. He stated that genetic engineering is one of the greatest breakthroughs in recent history that has helped immensely mankind. He also explained that animals and plants can be tailor made do show desirable characteristics through genetic engineering .

DELIVERING LECTURE
