

COMMON PARASITES IN FISH CULTURE AND CONTROL MEASURES

Date : 21-08-2014

Class : II BZC students

Resource Person: Smt. C.S.Chakrani,
Fisheries Development Officer,
Government Fish Seed Farms,
AP Fisheries,
Penamalur,
Krishna Dist

Brief Report : Smt.Chakrani addressing the students stated that presence of pathogens, low disease resistance and poor water quality are the three major causes of fish diseases that lead to reduction in the growth rate in fisheries sector. She explained the different symptoms through which the diseased fish is identified. She said that environment would play a major role in preventing the diseases.
