

Magic Square Dance

On the occasion of National Mathematics day, students performed a magic square dance on 22-12-2014 and on 22-12-2015.

An imaginative and innovative form of dance performance using mathematics has enthralled the gathering. This dance show portrayed the 3x3 magic square where the students chose the numbers simultaneously while dancing so that the sum of any horizontal, vertical or diagonal set of students take up the numbers which add up to the asked number.

2015-16
