

Organised a Workshop on “Speed Maths”

Resource Person: S.V. Rama Krishna Reddy,
Expert in Speed Mathematics

Sri. S.V. Rama Krishna Reddy introduced certain formulae that express naturally occurring mental processes by which mathematical problems can be solved with less effort. He gave shortcut methods for multiplication, finding squares, cubes of large numbers within fraction of seconds.

He explained the Criss-Cross, Duplex, reducing and balancing methods. About 200 mathematics students were benefited from the tips given in the Workshop which are useful for Competitive Examinations.

Speech by Sri. S.V.Rama Krishna Reddy
