

## **A FIELD TRIP TO SPRING MINERAL WATER PLANT**

III BSC students visited **Spring Mineral Water Plant**, Vijayawada on 23-10-2014.

### **Participants:**

A total number of 50 students and faculty.

### **Description of the programme:**

Students acquired knowledge about purification of water by using carbon absorption technique. In this process the students observed how carbon absorbs the impurities present in water. They also understood how the water is purified in different steps. They were educated about mineral water, demineralisation of water and preparation of distilled water.
