

TECHSPARKS-2K19

TECHSPARKS is the State- Level Technical Fest organised by the Department of Computer Science in which competition is conducted in various Technical and Non- Technical events for students every year. This event encourages students to participate and showcase their talents. Students put in their best efforts in learning how to manage time effectively, prioritize work, follow a schedule, and respect deadlines. Most of the activities being group-oriented students get the opportunity to know about people from different cultural backgrounds and interests. These healthy interactions not only enhance interpersonal and communication skills of students' but also prepare them for the real world.

Technical Event plays an important role in the college curriculum. It is one such event where young brains get to showcase their skills and compete with others to find the best. It is not just about the competitions but also an event where a lot of those new ideas are seen live and learn more and be inspired. Such inspiring events that happen every year in various colleges will guide students to dream bigger and make those dreams come true.
