

PHYTOREMEDIATION

Nature of Programme : Guest Lecture
Title : “Phytoremediation”
Resource Person : M. N. V. Prasad, Dept. of Plant Sciences,
School of Sciences, University of Hyderabad
Number of Students : III FMC & BZC Students
Date : 01/03/2023

Brief Report:

The resource person explained Phytoremediation refers to the technologies that use plants to clean up the soil, air, and water that have been contaminated by chemicals. Along with being a cost-effective method for environmental redressal, Phytoremediation has also proven to be a super solution in meeting any form of environmental challenges.
